

PENNY + GILES PRODUCES NEW INDUSTRIAL SHORTFORM BROCHURE

Christchurch, UK – Wednesday 30th November, 2011 – Penny + Giles, a business group of Curtiss-Wright Controls and designer and manufacturer of high precision electro-mechanical components, has produced a new shortform brochure for its joystick controllers, sensors and solenoids and solenoid valves – a product range that enables the company to actively compete in sectors as diverse as access control and specialised vehicles, to process control and motorsport.

The brochure looks in brief at the Penny + Giles range of fingertip operated rockers and joysticks, rugged single- and multi-axis joystick controllers; provides an overview of the company's linear, rotary and tilt sensors and in-cylinder and valve position transducers; and introduces its standard range of solenoids and solenoid valves including open-frame, tubular, AC laminated and latching.

Available initially in English, with French and German translations following soon, the brochure also summarises typical applications and experience for each of the product ranges.

For your copy call Penny + Giles on +44 (0)1202 409409, email sales@pennyandgiles.com or visit www.pennyandgiles.com.
